

# ULTRASONIC GAS METERS & BYPASS TECHNOLOGY

Ultrasonic gas meters are gaining in popularity; add in Jomar's two-valve bypass setup, and propane retailers have the ideal system. Our **premium lockwings** provide positive shutoff with lockout capability; and with a unique bypass valve setup, technicians can keep a constant flow of gas to the customer's home **while performing any necessary repairs**.

For a minimal investment, eliminate leak points and fittings on the initial install, and make future maintenance, repair, and replacements a breeze.

## Benefits

Wrench Operated, High-Torque Lockwing Cap with Full Port Positive Shutoff Valve  
Lockout Capability for Customer Shutoff / Safety

No More Relights  
Increased Route Efficiency  
Increased Technician Safety

## Bypass Options
